UNIVERSITY OF TECHNOLOGY, JAMAICA

FACULTY OF HEALTH AND APPLIED SCIENCE SCHOOL OF PHARMACY AND HEALTH SCIENCE

FINAL/RESIT EXAMINATION

GROUP: BPHARM 1/BMT 2/DN 2

DATE: DECEMBER 13, 2004

SUBJECT: BIOCHEMISTRY

DURATION: 2 HOURS

INSTRUCTIONS: ANSWER ANY TWO QUESTIONS

CHY1007

OUESTION 1.

a) The kinetics of an enzyme are measured as a function of substrate concentration in the presence and absence of inhibitor.

[S] (µ MOLES)	(VELOCITY IN µ MOLES/MIN)	
	NO INHIBITOR PRESENT	INHIBITOR PRESENT
3.0	10.4	4.1
5.0	14.5	6.4
10.0	22.5	11.3
30.0	33.8	22.6
90.0	40.5	33.8

i) Construct a double reciprocal plot for 1/V vs. 1/[S] for this data.

(10 marks)

ii) What are the values of V_{max} and K_m in the absence and presence of inhibitor? (15 marks)

iii) What type of inhibition is this and why?

(3 marks)

b) Discuss the levels of structure in protein architecture.

(8 marks)

Amino acids may be classified on the basis of their side chains.
Illustrate this point with the use of two named amino acids.

(2 + 2 marks)

 Explain lactose intolerance and why the prevalence differs in a named European vs. Oriental country.

(10 marks)

OUESTION 2

Outline the breakdown of a molecule of glucose as it goes through glycolysis, a) the Krebs cycle and the electron transport chain and calculate the net ATP yield after all three of these pathways are completed.

(15 marks)

Explain the biochemistry behind the Atkins diet. b)

(10 marks)

Discuss the symptoms, infectious agent and possible genesis of variant Creutzfeldt-Jakob Disease (vCJD).

(10 marks)

- (i) Outline the steps in the beta oxidation of a saturated twenty carbon fatty acid and calculate the number of ATP produced.
 - (ii) Describe lipid thermogenesis and explain its function.

(10 + 5 marks)

QUESTION 3.

- Explain in detail how nuclear DNA directs the production of a protein molecule. (15 marks)
- b) Illustrate a method by which one could implant a foreign gene into bacteria by using a plasmid vector and then test for successful implantation. (10 marks)
- c) Give a detailed description of the generation of c.AMP by a named hormone and explain its use.

(15 marks)

Discuss the importance of biochemistry to the study of Dietetics/Nutrition or Pharmacy or Medical Technology

(10 marks)

"END OF PAPER"
